Figure 2– Computer Network

ar
Figure 2 illustrates a system including a first computer system 82 that executes a first or main graphical program that is desired to be debugged, and a second computer system 90 that may store and/or execute a debugging graphical program. The computer system 82 may be connected through a network 84 (or a computer bus) to the second computer system 90. The computer systems 82 and 90 may each be any of various types, as desired. Also, the network 84 can also be any of various types, including a LAN (local area network), WAN (wide area network), the Internet, or an Intranet, among others.

REMARKS

Applicant is in receipt of the Notice of Omitted Items mailed on 10/2/2001. The Notice stated that Figure 1A described in the specification was missing. Applicant states that these portions of the specification were meant to refer to Figure 2, and there actually is not a Figure 1A. This is an obvious error in the specification, as the portions of the specification referring to Figure 1A clearly refer to Figure 2, and Figure 2 is otherwise not described. Thus no Figures were missing from the patent application. Rather, the specification erroneously referred to Figure 1A instead of to Figure 2. This Amendment corrects the errors in the specification.

CONCLUSION

In light of the foregoing amendments and remarks, Applicants submits the application is now in condition for allowance, and an early notice to that effect is requested.

If any fees are due, the Commissioner is authorized to charge said fees to Conley, Rose, & Tayon, P.C. Deposit Account No. 50-1505/5150-59901/JCH.
